OUTDOOR TERRACE LIGHTING

A large outdoor light designed with a long reach to effortlessly illuminate expansive areas. Its design draws inspiration from botanical elements, incorporating cut-outs in the shade to foster an open and airy feel, allowing the internal illumination to be visible from the outside. The interplay of light and shadow produces a striking effect, with brighter colors shining through where the light meets the inner surface.

DESIGN: JOEL EN KATE BOOY / STUDIO TRULY TRULY

SPECIFICATIONS	VALENCIA
